PREPARING FOR THE INSTALLATION **Before you start, please read these critical steps below**		STEP 1
BEFORE YOU START THE INSTALLATION, READ THIS GUIDE!		
VISIT **Rosen Dealer Central** For the latest Updates, Corrections and Technical Tips about this product and installation www.**RosenDealerCentral**.com		
CHECK THE BATTERY Test the battery voltage to make sure it's fully charged to a minimum of 12.8 VDC This only takes seconds and can save hours of troubleshooting later.		
TURN THE VEHICLE *OFF* Keep the Vehicle Off during the installation to avoid setting various Vehicle Fault sensors		
Keep the Vehicle OFF during the installation Failure to follow this may cause the AIRBAG FAULT SENSOR to become enabled. Dealer Service Departments charge a significant fee to reset the Fault Sensor.

REMOVE THE FACTORY RADIO

You will need to remove multiple interior trim components prior to removing the factory radio. The following steps will help guide you through this process.

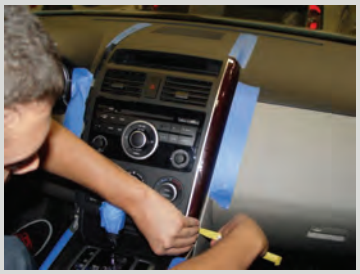
STEP 2

Carefully Remove Left Dash Trim

Carefully remove left side dash trim

Carefully Remove Right Dash Trim

Carefully remove right side dash trim



Remove Shifter Trim

Carefully remove shift knob trim

Remove Lower Tray Screw

Remove 1 phillips screw from lower tray

Remove Lower Tray

Carefully remove lower tray assembly

Remove Radio Trim Bezel Screws

Carefully remove 2 x phillips screws to remove radio

Remove Radio Dash Trim

Carefully remove dash trim surrounding radio

Remove Radio Mounting Screws

Carefully remove 4 x phillips radio mounting screws and remove radio by pulling towards you

LOCATING REMOTE COMPONENTS

You will need to mount the GPS and Optional Satellite Radio Antennas on the exterior of the vehicle. And mount the iPod Interface Connector in the vehicle. The following steps will help guide you through this process.

STEP 3

Use Caution around SRS Components

It is the **installer's responsibility** to ensure that the safety equipment in the vehicle is **NOT** adversely affected by installation of this system. Ensure that the routing of the harnesses do NOT obstruct airbags, SRS or other safety devices.

Mount the GPS and Sat Radio antenna in a location on the exterior of the Vehicle

Route the GPS harness away from other power harnesses in the vehicle.

This will help to ensure optimum performance of the GPS system.

"OPTIONAL"

Install the iPod interface connector in a location accessible to the end-user

Locate the iPod interface module in an area which can be serviced in the future.

The iPod cable is intended to be a serviceable item, which plugs into the iPod/Sat radio Interface Module.

INSTALL THE ROSEN NAVIGATION SYSTEM

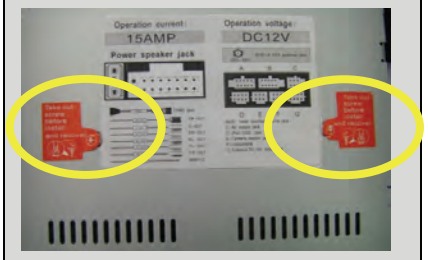
You will need to prepare the Rosen Navigation System for installation in the vehicle.

STEP 4

Remove the DVD Transport Screws

There are 2 x Phillips Transport Screws which protect the DVD Mechanism during transportation.

Transport Screws must be removed prior to installation.



Connect the Power and GPS Harnesses

The GPS Harness must be tightened with a WRENCH to ensure it is properly seated.

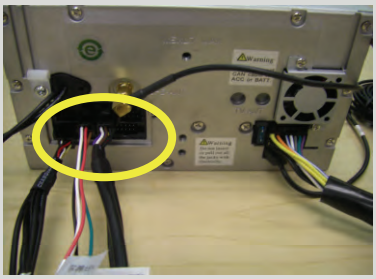
Be sure to use white cable clamp to secure GPS antenna cable

Failure to follow this step may result in poor GPS signal

Connect Optional Harnesses such as iPod, Satellite Radio, Camera, Reverse Sensors

These harnesses must be fully engaged prior to the system installation.

See the Harness Diagrams for more information



Prepare the Vehicle side harnesses for connection to the Rosen Harness

Use care not to pinch or damage cables as this will cause performance issues/failures

Mount Rosen Navigation into Dash

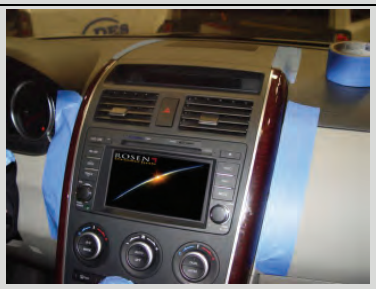
Insert Rosen Navigation System Into Dash and re-install radio mounting screws that were removed.

Turn the vehicle ON and confirm the unit is fully operational

With the connectors **Fully Engaged**, turn the vehicle on and press the **RESET** for 5 seconds on the unit.

Re-Install Dash Trim Components

Re-install all dash components that were removed in step 2



Insert a DVD to confirm the Video Disable Circuit is properly Operating.

The Brake Wire must be connected to the Park Brake Indicator Wire to complete a ground when the brake is engaged.

Notice
Some features are not intended for viewing by the Driver while the vehicle is in motion.
For further details, please refer to the Owner's Manual

ENABLE INSTALLER SETTINGS

You will need to select certain Installer Setting based on any Optional Equipment that you may have installed

STEP 5

Launch the Installer Setting Screen

From any screen with the Menu Button, follow these steps to display the Installer Setting Screen, select:

1) From any Screen, select “Menu”
2) From the Menu Screen, select “Settings”
3) Press “Keypad,” Press “7253” and “Enter”

Select the individual Settings as needed for the installed components

Selectable options vary by product and installation. Select the options as applicable for the installed optional components.

Perform Pre-Delivery Tests

STEP 6

You will need to perform several Pre-Delivery Tests to ensure customer satisfaction
Some optional equipment may not be applicable

Turn the vehicle ON and System ON

Confirm the unit starts up properly

Troubleshooting

1) Reset the System while the Vehicle is ON
2) Confirm all connectors are properly installed
3) Check the Vehicle and System Fuses

Select RADIO as the Source

Confirm that the AM and FM reception are as expected

Troubleshooting

1) Confirm Antenna is properly connected.
2) Reset the System

Select SATELLITE RADIO as the Source

Confirm Channel 001 is present after ~5 minutes

Troubleshooting

1) Confirm the SAT Radio is Turned ON in the Installer Settings
2) Confirm the antenna has unobstructed view of the Sky
3) Confirm the antenna is located on the outside of the vehicle

Select iPOD as the Source

Confirm iPod is communicating and playback is OK

Troubleshooting

1) Confirm iPod Version Compatibility – not all are compatible
2) Confirm the harnesses are properly engaged
3) Reset the System

Installation Guide Mazda CX-9

Select CD as the Source

Confirm CD audio playback is OK

Troubleshooting

1) Confirm the Disc is Store Bought and in good condition
2) Reset the system

Select DVD as the Source

Confirm DVD video playback is OK

Troubleshooting

1) Ensure the Park Brake is set to view video
2) Confirm the Disc is Store Bought and in good condition
3) Reset the system

Select MP3 as the Source

Confirm MP3 playback is OK – Select Favorites

Troubleshooting

1) Confirm that a Test Track exists in the Favorites Folder
2) Reset the system

Select Phone as the Source

Confirm Phone Pairing is successful

Troubleshooting

1) Confirm the Phone has BT and is in discoverable mode
2) Confirm the Phone is compatible with the system
3) Reset the system

Select NAV as the Source

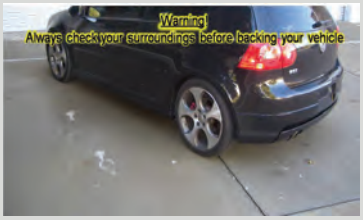
Confirm the Navigation loads and signal strength is OK

Troubleshooting

1) Confirm the antenna has an unobstructed view of the sky
2) Confirm the antenna is located on the outside of the vehicle
3) Confirm the antenna connection is properly tightened

Select Reverse Camera

Confirm the backup camera screen shows in reverse



Troubleshooting

1) Confirm the Camera is set to ON in the Installer Settings
2) Confirm the Reverse Trigger wire is attached properly
3) Confirm the Camera is receiving 12VDC as required
